

MAKING YOUR MONEY COUNT

#Team
Leeds Be Well

INTRODUCTION

In today's world, it's not uncommon for many of us to face financial worries at various stages of our lives – whether that's saving for a new home, preparing for retirement, or simply trying to make ends meet, at some point we could all do with a little help and advice.

With that in mind we hope you find this booklet useful. It's full of useful hints and tips on how to save money around the home, where to do your weekly shop for the lowest price - there's even a 'couch to financial fitness' programme because just as we can do something to improve our mental and physical wellbeing, there are things we can do to improve our financial wellbeing. So, we can all pay the bills today, deal with the unexpected and look forward to a healthy financial future.

Throughout this document you will see the use of QR codes – to access any of this information simply open the camera app on your phone, placing the QR code in frame – a URL or notification should then appear depending on your device. Alternatively, if you are viewing this document on screen you can access the information by clicking on the links.

IN YOUR LIVING ROOM

As the energy crisis continues and we all face a rise in our bills it makes perfect sense to consider how we can potentially reduce the impact on our household budget.

Over the next few pages, we look at some simple hints and tips we can apply around the home that not only reduce our carbon footprint but can potentially reduce our bills too.

Some of us however may already be proactive around the home so following this section you will find information relating to further support, information and help with coping the rising cost.

Draw your curtains at dusk to stop draughts and heat loss.

Look at turning the brightness down on your TV - the brighter the setting the more energy is being used.

Fit radiator foil behind radiators on external walls to direct heat into the room and move furniture away from radiators and heaters.

If you have an open fireplace that's out of use, try a chimney balloon to prevent loss of warm air. You can purchase these from your local builders merchants.

Keeping your home warm is important for your health.

To avoid potential health problems, keep the room you spend most time in between 18°C and 21°C (64°F and 70°F). The best temperature for other rooms is 18°C (64°F).

Turning off electrical appliances like a TV, phone and chargers at the wall will save you money.

Use energy efficient light bulbs to save money.

IN YOUR KITCHEN

Gas hobs are more energy efficient than electric, but slow cookers and microwaves are by far the most efficient.

Boiling water for pasta or vegetables in the kettle, takes less time and uses less energy. Remember only boil the amount of water you need.

When washing food use a bowl and save up to 7 litres a day.

Make sure your washing machine has a full load and you will save up to 8 litres a day of water.

Wait to switch on your dishwasher until you have a full load, and save up to 2 litres a day.

Potential savings in your kitchen,
£32.32
per year.

Regularly defrost your freezer, to make sure it's operating at full efficiency.

IN YOUR BATHROOM

Repair a dripping tap, and save up to **9 litres** a day.

Turn off the tap when brushing your teeth and save up to **32 litres** a day.

Be conscious of when you're switching your immersion heater on and off. Make sure it is not on 24 hours a day.

Take a shorter shower, and save up to **18 litres** a day.

Fill a basin when washing your face or shaving, rather than letting the tap run and save up to **12 litres** a day.

Potential savings in your bathroom, **£65.56** per year.

OUTSIDE THE HOME

Installing double glazed windows, if not already fitted, could save from **£50 to £130 per year.**

Most heat is lost through walls - installing cavity wall insulation could save you up to **£245 per year.**

Loft insulation can save you up to **£250 per year.**

Stop draughts by using sealants, brushes and rubber strips around doors and windows. This could save around **£20 per year.**

Dry clothes outside when you can.

FOOD & SUPERMARKET SHOPPING

We've all seen the adverts about how much can be saved by simply switching supermarkets - but with so many different offers on products which are constantly changing - how do we know if it's actually cheaper? Do we write a list before we go and how many of us go shopping when we're hungry?

All of these things may seem trivial but over the year they all contribute to us paying more for our shopping than was necessary. And just as energy prices are rising so to is the cost of our weekly shop - so why not try Martin Lewis' challenge of saving a thousand pounds on your annual supermarket shop or see if you can get the same elsewhere using the supermarket comparison app.

LEEDS SCHOOL UNIFORM EXCHANGE

Kirklees School Uniform Exchange

More and more of us are now using the internet to shop than ever before. Largely due to the pandemic but also because of the convenience - we can shop at a time that suits us. There's also the offers and lure of the discount code but did you know the internet has loads of free things too. So, whether you're looking to decorate or like me your children only have a growing spurt a week after you've bought their uniform - take a look at the websites below and see what you can save today. But before you get the bargain of a lifetime or even make few pounds selling your old stuff, have a look at the videos and information below to ensure your experience is a safe and secure one.

HAVING A CONVERSATION ABOUT MONEY...

We talk to our friends and family about a lot of things but how many of us talk about money?

At what stage do we start informing our children that chocolates aren't free and helicopters cost more than £2. Below you will find some useful hints and tips to start these and other conversations because even with friends and family - talking about money can sometimes be difficult.
